PANTAI 2 SEWAGE TREATMENT PLANT

The existing Pantai CSTP consists of large Aerated lagoons and recently constructed mechanize plant (which are separated by the NPE) has a total capacity for 877,000 PE, whereas the Pantai CSTP is presently serving a connected PE of 1.18 million. Thus, the Pantai CSTP is highly overloaded and has to be upgraded immediately. The new STP (P2STP) is to be constructed at an ultimate capacity of 1.423 million PE

The P2STP will be developed as an underground facility with ground/area above the STP developed as a leisure park with sports, recreational, administration building and community facilities for the local residents.

BANDAR UTAMA CITY CENTRE SEWAGE TREATMENT PLANT

Bandar Utama has adopted is the central sewage treatment plant that processes all sewage and food waste and recovers up to 95% or more of the water used in the area. Wastewater recycling involves wastewater treatment, where greywater is reused for toilet flushing, air-conditioning cooling towers and landscape irrigation.
