SPEAKER'S PROFILE

JOEL GOOD M.A.SC., P.ENG

Joel is a Principal and the Sustainability Practice Area Leader with RWDI. He is a trusted advisor on projects aiming to create comfortable, sustainable and resilient built environments in balance with a site's natural resources and climatic risks. Joel is an industry leader, through research and practice, on incorporating future climate forecasting into the design process, from considering long-term energy, carbon, occupant and comfort implications to assessing extreme climate risk and resiliency mitigation measures. Joel is a Certified Passive House Consultant and WELL Faculty member.

COURSE AGENDA

Climate Resiliency

- What is the challenge that faces us?
- How do we perform a climate resiliency assessment (CRA)?
- Future Climate Hazards for Malaysia
- CRA Case Studies
- CRA Resources
- Question & Answer session
